| QATC-1014437 | Average |
| QATC-1014413 | Average |
| QATC-1014332 | Average |
| QATC-1014274 | Average |

## Testing environment

| | |
|---|---|
| Operating system: | Windows 11 (64-bit) |
| Browser: | Google Chrome (150.0.7871.115) |

## Recommendations

- We recommend fixing the QATC-1014665 defect as a priority, since the Payment page returns "not found" – this blocks the entire booking flow end-to-end and prevents any session from actually being purchased.
- After fixing the bugs found in the Book Information module, we recommend an additional round of regression testing specifically on that module, as a large number of defects (11 total, 9 of them Major) were found there, spanning validation, pricing calculation, and data mapping – suggesting the underlying form logic needs a broader review rather than isolated field-by-field fixes.
- Fix the QATC-1014296 defect (Motion Gallery page fails to load) with priority, as this makes an entire content type inaccessible and prevents any further testing of Motion-specific functionality (pagination, photo viewer, tooltips) until the page loads correctly

# Project Gregory Olsen. Photo Studio

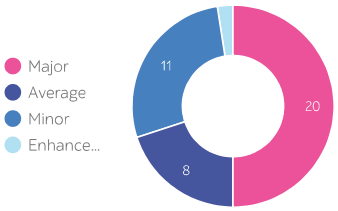

Product version: 1.0

**General quality analysis**

The overall quality of the application can be estimated as Medium. The total number of defects is 40. Functional defects prevail **72.5%**, none of them have Critical severity and **50%** of defects (20) gain the Major severity. The majority of defects is opened for module **"Book Information"** (11 defects, 9 Major), which points to a localized weakness in the booking flow. The **"Payment"** module has only a single defect, but it blocks the app's core business flow entirely – the Payment page returns **"not found,"** preventing any purchase from being completed. A detailed quality analysis is presented below.

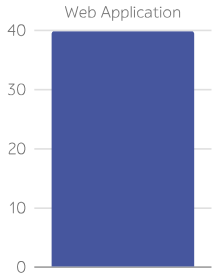

# Detailed quality analysis

### The total number of defects by severity

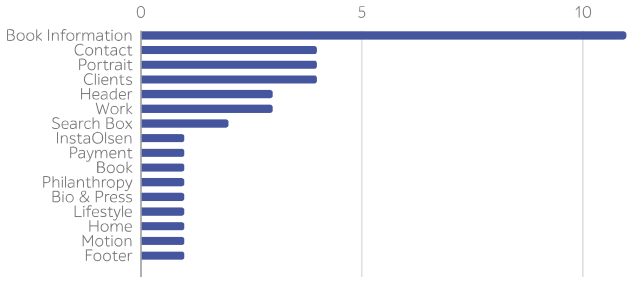

The chart shows the statistics of defects by the degree of the negative impact they have on the application. Almost **50%** of issues have **Major** severity. **Average (20%)** and **Minor (27.5%)** defects make up most of the remainder, with a single **Enhancement suggestion (2.5%)** also identified.

### The total number of defects by platform

The chart presents the ratio of defects by platform. For **Web Application** platform **40 issues** were found.

### The total number of defects by components

The chart illustrates the distribution of defects across the application modules. The highest number of defects was identified in the **"Book Information" module (11)**. The **"Contact" module (4)**, **"Portrait" module (4)**, and **"Clients" module (4)** contained the next highest number of defects.

### Quality of separate modules

| Module | Quality | Comments |
|---|---|---|
| Book Information | Medium | The quality of this module is estimated as Medium. 11 defects were found here, 9 of them with Major severity – the most among all modules. The most significant issues are that Total price is miscalculated when Additional Subjects is selected (QATC-1014529), and that session photos are cross-mapped between session types (QATC-1014587, QATC-1014544). Contact Information field validation is also broken across the board, accepting invalid data types (QATC-1014658). The list of defects actual for module "Book Information" is here. |
| Contact | High | The quality of this module is estimated as High. 4 defects were found here, one with Major severity: the LastName field only accepts up to 8 characters instead of the required 48 (QATC-1014483). The remaining defects are Minor, including generic browser validation messages instead of custom ones (QATC-1014466). The list of defects actual for module "Contact" is here. |
| Portrait | Medium | Medium The quality of this module is estimated as Medium. 4 defects were found here. The most significant issue is that the pagination "Next" button loops between pages 2 and 3, making page 4 unreachable (QATC-1014317). Additionally, page 1 displays an unknown photo while the correct one is missing (QATC-1014309), and preview photos do not match the required 225×130px size (QATC-1014332). The list of defects actual for module "Portrait" is here. |
| Clients | High | The quality of this module is estimated as High. 4 defects were found here. The most notable issue is that photo links for "Caleb Colpitts" and "Kate Cleaves" are cross-mapped to each other's destinations (QATC-1014432). Two client photos ("Laser Performance" & "MAM") are also missing from the list (QATC-1014413). The list of defects actual for module "Clients" is here. |
| Header | Medium | The quality of this module is estimated as Medium. 3 defects were found here. The most significant issue is that the Sessions tab is missing from the header while on the Contact page (QATC-1014283), restricting navigation. Minor issues include no logout option present (QATC-1014513). The list of defects actual for module "Header" is here. |
| Work | High | The quality of this module is estimated as High. 3 defects were found here, all Minor. Preview photos across galleries appear with Russian-language viewer buttons instead of English (QATC-1014388), and tooltips showing photo numbers do not appear on hover (QATC-1014342). The list of defects actual for module "Work" is here. |

Time spent: 96 hours

| | | |
|---|---|---|
| Search Box | Medium | The quality of this module is estimated as Low. 2 defects were found here. The most significant issue is that the header Search box is not functional at all (QATC-1014680). Additionally, placeholder text does not reappear after the cursor is removed (QATC-1014687). The list of defects actual for module "Search Box" is here. |
| Payment | Low | The quality of this module is estimated as Low. Only 1 defect was found, but it is critical to the business flow: the Payment page returns "not found," meaning users cannot complete a booking (QATC-1014665). The list of defects actual for module "Payment" is here. |
| Motion | Low | The quality of this module is estimated as Low. Only 1 defect was found, but the entire Motion Gallery page fails to load under the Work tab, making the whole gallery type inaccessible (QATC-1014296). The list of defects actual for module "Motion" is here. |
| Bio and Press | Low | The quality of this module is estimated as Low. Only 1 defect was found, but the page has no content besides the title, header, and footer – the module effectively provides no information to the user (QATC-1014390). The list of defects actual for module "Bio & Press" is here. |
| Lifestyle | Medium | Medium The quality of this module is estimated as Medium. Only 1 defect was found: clicking a photo on page 3 opens a single, static photo view with no way to navigate between photos, requiring the browser's back button to exit (QATC-1014347). The list of defects actual for module "Lifestyle" is here. |
| InstaOlsen | Medium | The quality of this module is estimated as Medium. Only 1 defect was found: the redirected URL mismatches the URL specified in the requirements (QATC-1014676). The list of defects actual for module "InstaOlsen" is here. |
| Book | Medium | The quality of this module is estimated as Medium. Only 1 defect was found: for the Standard session, the Additional Subjects dropdown on the Book page has 7 values instead of the required 10 (QATC-1014562). The list of defects actual for module "Book" is here. |
| Footer | Medium | The quality of this module is estimated as Medium. Only 1 defect was found: the footer is not present on the Contact page under the Connect tab (QATC-1014290). The list of defects actual for module "Footer" is here. |
| Philanthropy | High | The quality of this module is estimated as High. Only 1 defect was found here: the article has missing client quotes at the end and a repeated typing mistake in the second paragraph (QATC-1014448). The list of defects actual for module "Philanthropy" is here. |
| Home | High | The quality of this module is estimated as High. Only 1 defect was found, and it is an Enhancement suggestion rather than a defect: preview photos do not link to their corresponding galleries (QATC-1014337). The list of defects actual for module "Home" is here. |
